

Snowman Magnet or Pin

This snowman was made as a magnet for our refrigerator. He could easily be made smaller and stuck to a piece of cardboard with a pin attached.

If using hot glue, parental supervision is recommended. This project is rated EASY to do.

What You Need

- * 3 White pom-poms (ours are 1/2" round)
- * 2 Wiggle eyes
- * Red sock or felt
- * Black felt
- * Thin marker to trace on felt
- * Tacky glue or hot glue
- * Tip of an orange crayon, or piece of Fimo clay, felt, or construction paper
- * Popsicle Stick or piece of cardboard
- * Magnet strip with adhesive or jewelry pin

How To Make It

1. Take 3 pom-poms and glue to Popsicle stick. (see photo)
2. Take an old red sock and cut an 1/2" wide x 8" strip out of the cuff. (see tips below)
3. Tie the "scarf" around the snowman's neck.
4. Glue on wiggle eyes.
5. Cut buttons out of scraps of black felt and glue on snowman.
6. Depending on the type of nose you want for your snowman, glue on a tip of a crayon, shape a piece of Fimo into a carrot shape, or cut some orange felt or construction paper. Glue on to snowman's face.
7. Cut a rectangle out of black felt 3" x 4" long.
8. Glue the short ends together to make the hat.
9. Trace around the top of the hat to make a circle to fit. Cut out and glue on one end of the hat.
10. Trace around the bottom of the hat, making the circle slightly larger to make the brim. Cut out.
11. Stuff the hat lightly with felt scraps to help it keep the shape.
12. Glue the brim to the bottom of the hat.
13. Glue the hat onto the snowman's head and anchor onto the Popsicle stick.
14. Glue a magnet strip to the back of the popsicle stick.
15. When all is dry, put on your refrigerator and enjoy!

Tips

Note: If your sock cuff is not long enough, cut a 1" wide strip. Then cutting down the middle of the strip, stop right before reaching the end. Straighten out and this will make a longer strip to tie around the snowman's neck.
